EXPERIMENT 11

Deploying a Zoho Creator Application from Development to Production Environment

JASHWANTH SUNDARAJAN | 241401032 | B.TECH CSBS

Aim:

To deploy the Gym Membership Management application from the Development environment to the Production environment using Zoho Creator, with testing in the Stage environment before final deployment.

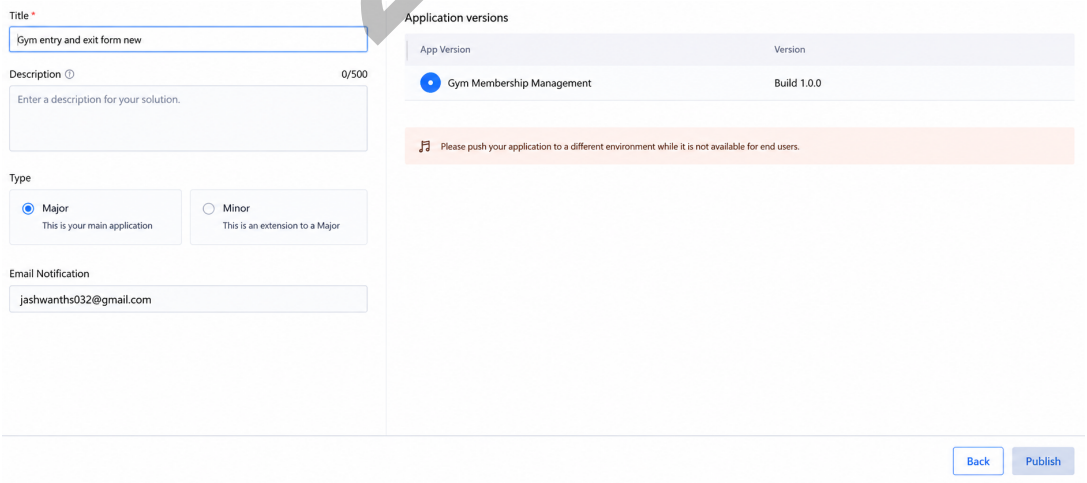

Procedure:

Step 1: Open the Application

- Log in to Zoho Creator.
- Open the Gym Membership Management application.
- Navigate to **Deploy → Environments**.

Step 2: Deploy to Stage

- Click the **Publish** option.
- Select **Publish to Stage**.
- Choose the Gym Membership Management application.
- Review the components and changes to be deployed.
- Enter the version title and description.
- Confirm the publishing process and wait for deployment to complete.

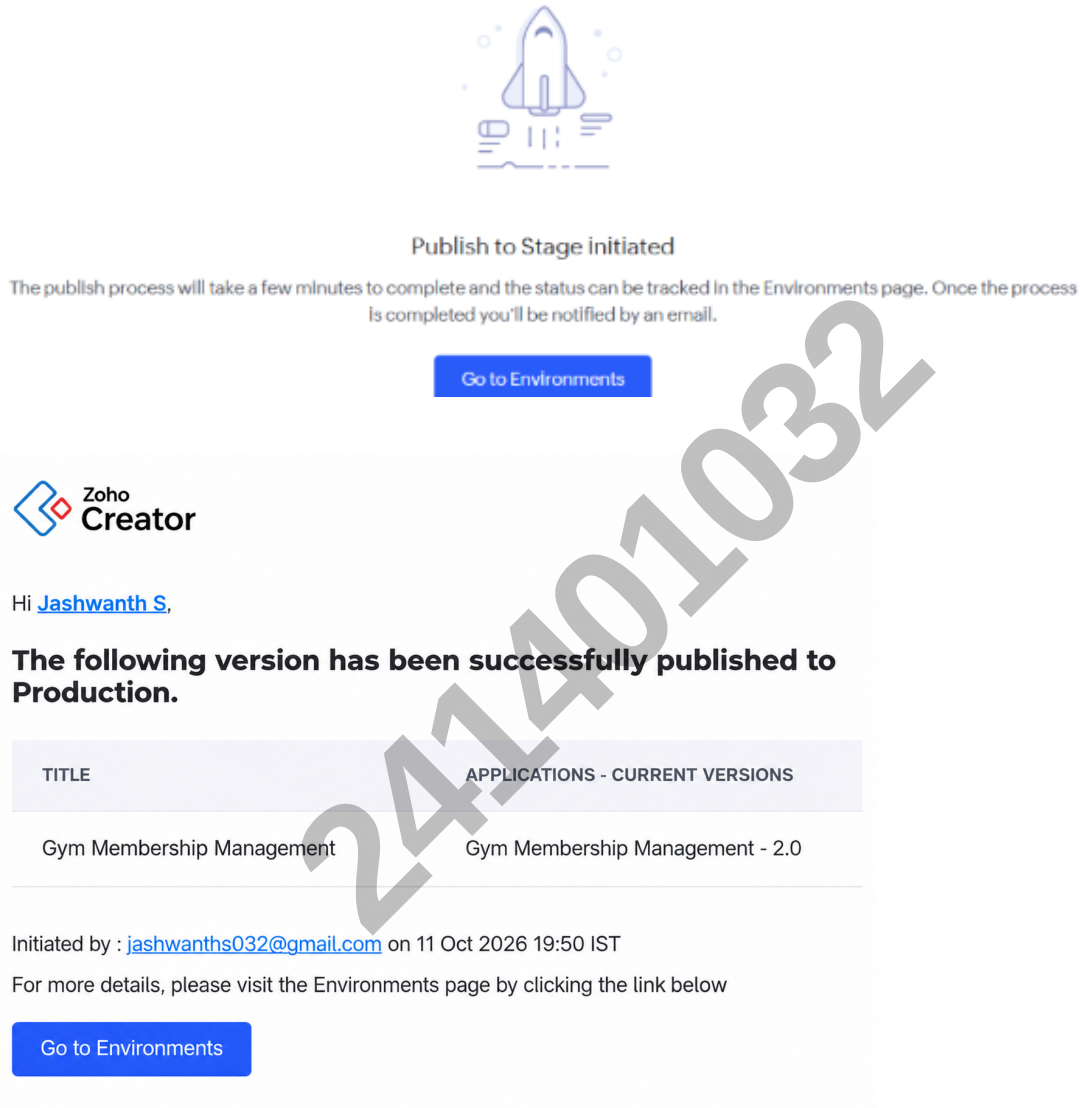

Step 3: Test the Stage Environment

- Open the deployed application in the Stage environment.

241401032

- Test the gym member registration form by entering sample member details.
- Verify that submitted records appear correctly in the report.
- Check the activity-preference subform and its saved records.
- Verify the functionality of the application before production deployment.

Step 4: Deploy to Production

- Navigate to **Deploy → Environments**.
- Click **Publish** and select **Production**.
- Select the version that was tested in Stage.
- Review the deployment details and confirm the changes.
- Click **Publish** to begin the production deployment.

- Wait until the deployment process is completed successfully.

Zoho Creator

Hi Jashwanth S,

The following version has been successfully published to Production.

TITLE	APPLICATIONS - CURRENT VERSIONS
Gym Membership Management	Gym Membership Management - 2.0

Initiated by : jashwanths032@gmail.com on 11 Oct 2026 19:50 IST

For more details, please visit the Environments page by clicking the link below

Go to Environments

Step 5: Verify Production Deployment

- Open the application in the Production environment.
- Check that the application is accessible.
- Submit a test member registration, if permitted.
- Verify that the form, report, and activity-preference subform function as expected.

Result:

The Gym Membership Management application was deployed from the Development environment to Stage and tested successfully. The tested version was then published to Production, completing the deployment process in Zoho Creator.
