Experiment 8: Configuring User Management and Role-Based Access Control (RBAC) in Zoho Creator

Aim:

To configure user management and Role-Based Access Control (RBAC) in a Zoho Creator gym membership application by creating roles, assigning permissions, and verifying access.

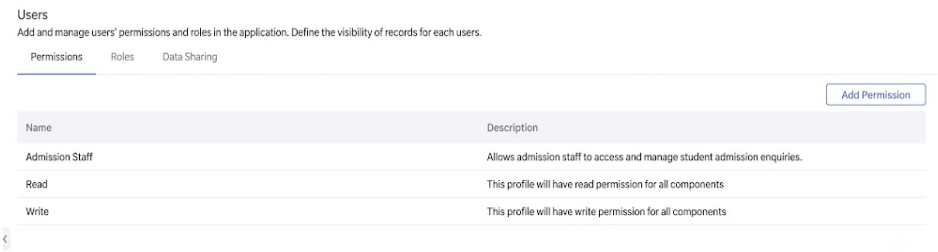

Procedure:

1. Open the Application

- Log in to Zoho Creator and open the Gym Membership Management application.
- Navigate to the application settings.

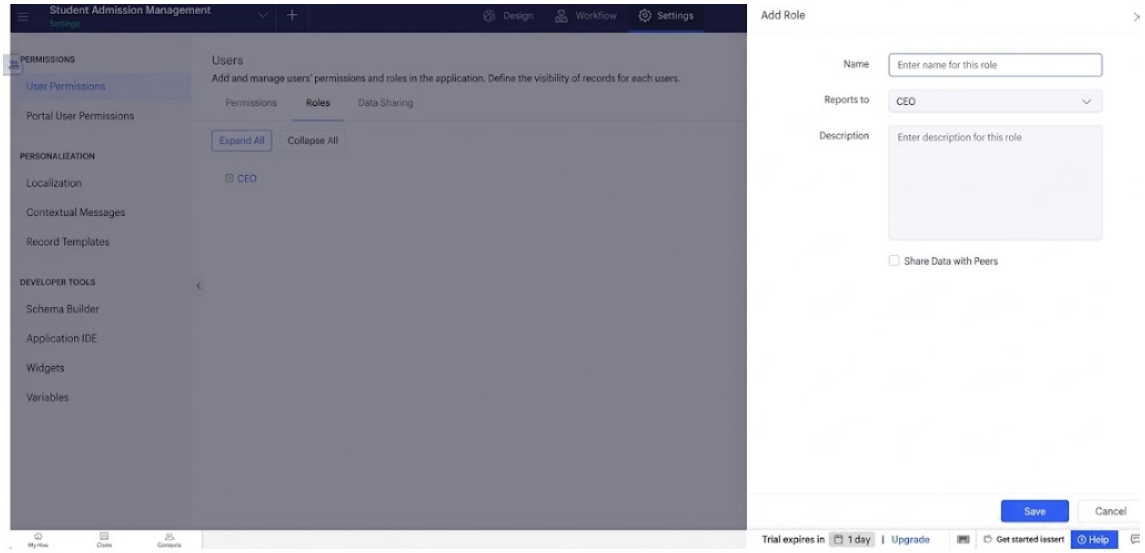

2. Create User Permissions

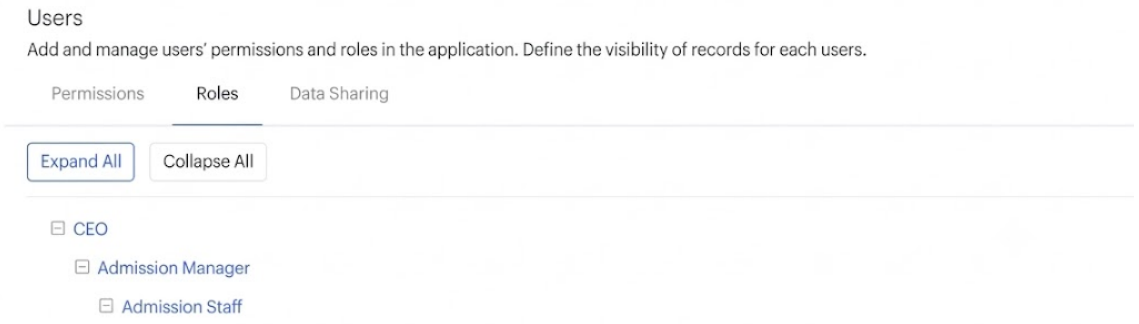

- Open Settings → User Permissions → Permissions.
- Create a Membership Staff permission and configure access to the gym membership form and report.

3. Configure Role Management

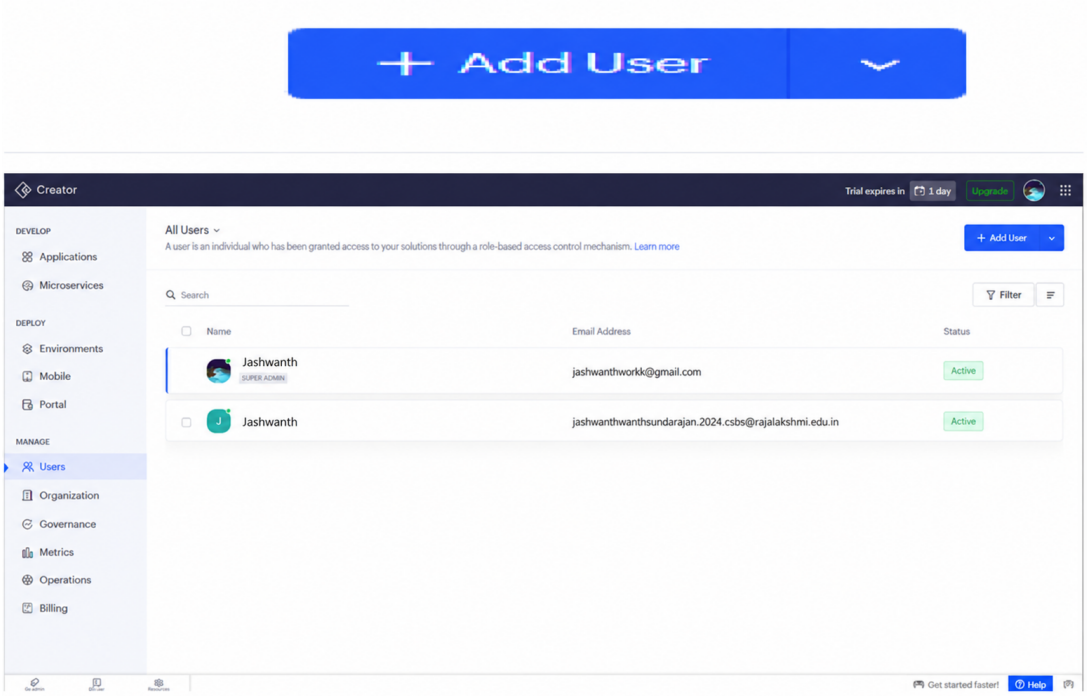

- Navigate to the Roles section.
- Create the Membership Manager and Membership Staff roles.
- Configure the role hierarchy, if available.

4. Add and Verify Users

- Navigate to Manage → Users and add a test user.
- Assign the Membership Staff role and its corresponding permission.
- Enable the notification email option and verify the invitation through email.

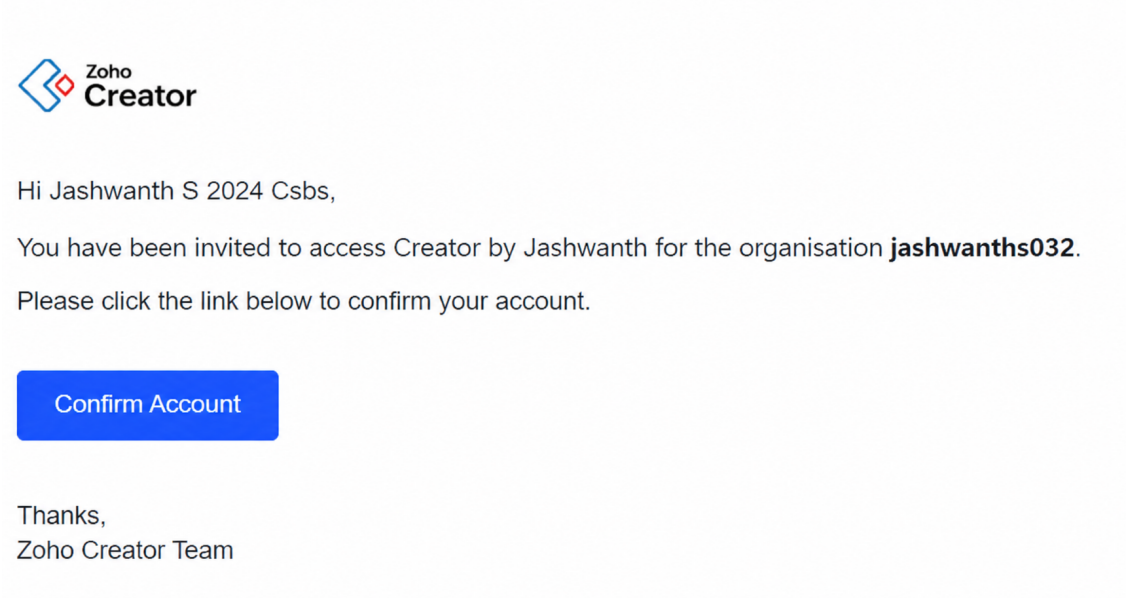

5. Configure Access Control

- Set the required access, view, and edit permissions for gym membership enquiries.
- Disable delete permission for Membership Staff.
- Save the permission settings.

6. Test Role-Based Access

- Open the application using the invited user's account.
- Test access to the Membership Enquiry Form and Membership Enquiry Report.
- Verify that the available actions follow the assigned permissions.

2414010324

Result:

User management and Role-Based Access Control (RBAC) were configured in the Zoho Creator gym membership application. The Membership Manager and Membership Staff roles were created, permissions were assigned, and a test user was invited and verified to demonstrate access control.
